# How to do Research

This is as much discussion as presentation so please interrupt!

#### Roadmap

Choosing and Refining Ideas

Finding/Reading Academic Papers

Project Scale and Prior Work

Collaboration

Please don't make us go to court

Meet with staff next week

- What do you 🖤 ?
  - Hobbies? Your favorite class?
  - Security is *everywhere*

- What do you 🖤 ?
  - Hobbies? Your favorite class?
  - Security is *everywhere*
- What do you use?
  - Do you understand how the devices around you work?
    - How does your computer know what time it is?
    - Caller ID???
    - The unlock button on a car remote?

- What do you 💜 ?
  - Hobbies? Your favorite class?
  - Security is *everywhere*
- What do you use?
  - Do you understand how the devices around you work?
    - How does your computer know what time it is?
    - Caller ID???
    - The unlock button on a car remote?
- What is exciting?
  - If you aren't excited about your project, no one else will be either

- What do you 🖤 ?
  - Hobbies? Your favorite class?
  - Security is *everywhere*
- What do you use?
  - Do you understand how the devices around you work?
    - How does your computer know what time it is?
    - Caller ID???
    - The unlock button on a car remote?
- What is exciting?
  - If you aren't excited about your project, no one else will be either
- Do you **enjoy** the type of work you're about to sign up for?
  - When you consider a topic, think about how you'll reach your result, not just about the result itself! Programming? Reverse engineering?

What problem are you solving?

Why is this an important problem?

What other work exists in the area?

What are the limitations of your approach?

What problem are you solving?

Anonymous communication is pretty slow

What problem are you solving?

Anonymous communication is pretty slow

Why is this an important problem?

People won't use it if it's slow

What problem are you solving?

Anonymous communication is pretty slow

Why is this an important problem?

People won't use it if it's slow

What other work exists in the area?

*Tor: more usable than academic works, but not as strong anonymity* 

What problem are you solving?

Anonymous communication is pretty slow

Why is this an important problem?

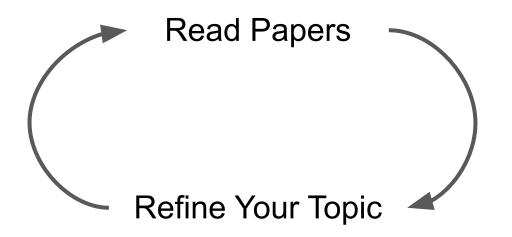

People won't use it if it's slow

What other work exists in the area?

*Tor: more usable than academic works, but not as strong anonymity* 

What are the limitations of your approach?

Better performance often means worse security

#### Roadblocks

Novelty: So you found a paper that looks like it already solved your problem

- Are there missing pieces to their solution?
  - See related work or, if present, "limitations"
- Is there a related problem that seems open?

#### Roadblocks

Novelty: So you found a paper that looks like it already solved your problem

- Are there missing pieces to their solution?
  - See related work or, if present, "limitations"
- Is there a related problem that seems open?

Scope: Your project is out of scope for a course project

• Any bite sized pieces you can break off?

#### Roadblocks

Novelty: So you found a paper that looks like it already solved your problem

- Are there missing pieces to their solution?
  - See related work or, if present, "limitations"
- Is there a related problem that seems open?

Scope: Your project is out of scope for a course project

• Any bite sized pieces you can break off?

Binary Projects: Your problem is either "solved" or "unsolved" with no middle ground

- You want steps along the way
  - Checkpoints along the way should be meaningful in their own right
  - Move the goalposts
  - See: Papers with titles of the format "Towards...."

### Finding papers (redux)

Cite related work!

- Important for your own understanding of the topic
- Credit where credit is due

It's okay if you miss some papers initially

- Or even over time. (course staff can help here)
- Very important to *do your best*
- Repeat your searches as your understanding grows

#### Collaboration

Research is best with friends

This is how you will refine your ideas and find bugs

It's easy to get into the weeds and lose sight of the big picture.

A fresh brain will catch things you missed.

Your classmates >> a rubber duck

#### Ethics

- This guy (Andy Sellars) is part of the CyberLaw Clinic
   Go to the BU Cyberlaw Clinic with legal questions!
- Absolutely no breaking of things without permission
  - Don't even look at things without permission
- Law is confusing do not make assumptions
  - Ask for help if ever unsure

#### Ethics
